

# HOMESCHOOL CLUB

*discover  
what's inside...  
improving health.  
enriching lives.*

## BEGINNING SEPTEMBER 2019

**Homework Club** involves collaborative group work through completion of a group project. Participants will be given different roles each week and will learn essential skills such as problem solving, compromising, conversation skills, and team work. Practice sheets will be provided each week to generalize skills outside of the group session. The program is led by ABA Therapists under the direction of a Board Certified Behavior Analyst®.

This group is intended for children with ASD ages 8-12. Participants must be able to work independently in groups of 2-3 students and have near typical language skills.
