BEGINNING SEPTEMBER 2019

LEGO® Club is a collaborative play therapy group in which children work in teams to build Lego models. Using the media of LEGO®, group facilitators target skills such as collaboration, joint attention, joint accomplishment, sharing, turn-taking, verbal communication, and non-verbal communication. The program is led by ABA Therapists under the direction of a Board Certified Behavior Analyst®.

This group is intended for children with ASD ages 5-8. Participants must be able to work independently in groups of 2-3 students and have near typical language skills.
