

# How does your child learn?

Our labs at the University of Waterloo include the **Lab for Infant Development and Language** and the **Developmental Learning Lab**. In our labs, we are fascinated by the development of cognition and language in infants, toddlers, and children.

Our studies rely on volunteers from the community. **Help us discover how children learn about language and the world around them!**

All of our studies take under 30 minutes to complete and are set up like games, shows on a stage, or shows on a TV screen, and are designed to be as engaging as possible.

Studies come with PRIZES or prize draw entries!

infant & CHILD  
STUDIES GROUP

## Do you have a child aged 0–7 years?

**We would love for you and your child to participate!**
