

Build Play Explore

Jr. Robotics

Jr. Robotics uses the WeDo Lego system to teach your child how to build and program their own creations!

The Lego WeDo program introduces participants ages 6-10 to robotics and computer programming. Participants will build their models with working motors, sensors and pulleys. They will then program their models and explore a variety of theme based activities while developing their skills in technology, language, literacy and social skills.

If your child has knowledge of basic computer skills, can create simple builds, and is able to follow instructions with diagrams then they will love this program!

Where: 500 Hallmark Drive, Waterloo, ON

When: Wednesday evenings April 4– June 6, 2018

Time: 5:30-7:00

Cost: \$330.00
